

Sub ECU
D1 W

78.(new) The method of claim 29 wherein the biological sample is isolated from a tissue selected from the group consisting of non-liver tissue, non-kidney tissue, non-bladder tissue, and non-testis tissue.

79.(new) The vaccine composition of any of claims 47 and 48, further comprising a pharmaceutically acceptable carrier.

Remarks

Applicants note that several claims previously were canceled at the time that the national phase application was filed, which the previous Examiner apparently did not appreciate. The previously canceled claims corresponding to the elected group of claims are added herein as new claims. Specifically, new claims 66-79 have been added; these claims correspond to originally filed (and canceled) claims 3-7, 10, 11, 14, 26-28, 31, 34 and 55. Claim 79 has been amended relative to original claim 55 in order to depend from elected claims only. No new matter has been added.

Respectfully submitted,

By: John R. Van Amsterdam
